

Sparkling Matter  
Matteo Nasini

April 9\_May 12, 2016

Clima Gallery is proud to present *Sparkling Matter*, a solo show by Italian artist Matteo Nasini.

Sparkling Matter is the result of Nasini's research in between sound, technologies and neuroscience to scan and transform into sound and substance the brain waves radiated during sleep's timing: dreams.

The project is composed of an environment installation for the sound experience and a series of porcelain sculptures realized from 3d prints that materialize *Sparkling Matter's* dreams, all originated by a test subject during multiple sleep sessions.
